

Decision of the Bureau

Categorization of recommendations and remaining issues

Taking note that the Review Mechanism and a number of States Parties have highlighted the importance of an ongoing dialogue and collaborative process between States Parties and the Court, and that, as pointed out in paragraph 7 of the “Introductory note” submitted by the Review Mechanism together with the “Categorization of recommendations and remaining issues”, “the categorization is not an explicit, i.e. scientific endeavour”,

1. *Recalls* all relevant preambular and operative paragraphs of resolution ICC-ASP/19/Res.7;
 2. *Welcomes* the efforts of the Review Mechanism to be inclusive and transparent in the exercise of its mandate within this State driven process as well as its reassurance that States Parties will be involved in the discussions on assessment and implementation of recommendations, regardless of whether they have been allocated to the Court or to the Assembly, with respect for existing mandates as well as judicial and prosecutorial independence;
 3. *Decides* to adopt the “Categorization of recommendations and remaining issues”, dated 30 April 2021, submitted by the Review Mechanism in accordance with paragraph 4 (a) of Assembly resolution ICC-ASP/19/Res.7.
